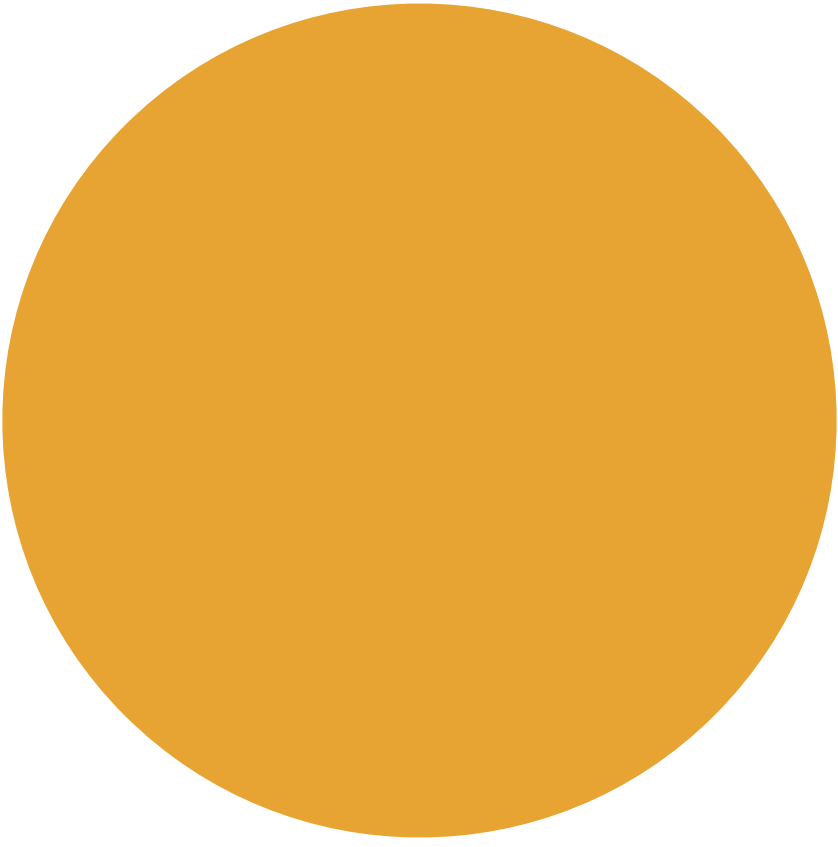
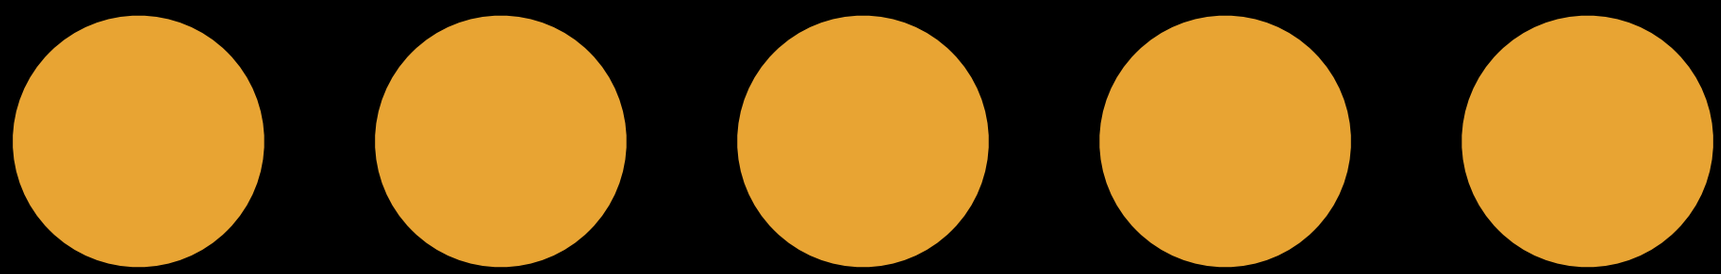
class



The class selector allows you to style a group of items with the same attributes.

If I change the class called “myCircle” to yellow, all the circles in that class turn:



```
<head>

    <link rel="stylesheet" type="text/css" href="styles.css">

</head>
<body>

<h1 class="odd">This is a headline 1</h1>

<h1 class="even">This is a headline 2</h1>

<h1 class="odd">This is a headline 3</h1>

<h1 class="even">This is a headline 4</h1>

<h1 class="odd">This is a headline 5</h1>

<h1 class="even">This is a headline 6</h1>

<h1 class="odd">This is a headline 7</h1>

</body>
```
